Functions of cChange

- A social media platform to upload images and choose charities to share awareness for non-profit organizations
- Resource for charities and NGOs to create campaigns that users can donate to

Design principles

- Navigation to a user's profile, a charity's profile and the option to upload a picture should always be available (picture upload is probably a swipe right – similar to facebook's camera)

Use Cases

Create an account

- User can sign up from login page
- Login with information or external social media profile
- Input payment information (Stripe Sandbox)

Login

- Input username and password from login page
